HBG EVAPORATION

ENHANCE ENERGY EFFICIENCY AND COST SAVING

The gas-heated HBG system, available in carbon or stainless steel tank options, is capable of evaporating wastewater at up to 30 gallons per hour. The combustion box in the HBG is made of advanced heat reflective material and features a unique energy-efficient design for reflecting the heat directly onto the floor of the evaporation tank for energy cost savings. A high-efficiency burner shoots a flame, fueled by natural gas or propane, into the combustion chamber for unusually high energy efficiency. The unit is made of heavy-duty steel, insulated and double lined for both energy efficiency and safety.

SUBMERGED COMBUSTION WASTEWATER EVAPORATOR

Evaporates waste water up to 30 gallons per hour

Combustion box made of advanced heat reflective material

Natural gas or LPG heated system

Reduces liability and exposure to RCRA regulations

Tank options - carbon or stainless steel

Safety Certifications

Simple and effective treatment slashes costs for off-site disposal and increase profitability

Footprint: 90.5" x 51" x 75"

ECONOMICAL ALTERNATIVE TO OFF-SITE DISPOSAL

Water volume reduction using evaporation technology can be an economical alternative to the high costs of off-site disposal of water, which can exceed \$1 USD per gallon. Evaporation costs can be a fraction of off-site disposal costs. Wastewater being hauled off-site is mostly water. Our evaporation systems may achieve up to a 95% volume reduction. This can translate into major costs savings and a quick return on investment for the purchase of the equipment.

CUSTOMIZE AND ACCESSORIZE

Accessories enhance the effectiveness of Water Maze Treatment Systems. Water Maze offers a broad selection of add-ons, accessories, parts, and consumables that support the performance of your water treatment systems.

DETERGENTS, MEDIA AND CONSUMABLES

Water Maze offers a variety of additives, defoamers and detergents that are compatible with your pressure washer equipment and enhance the effectiveness of pressure washer and water treatment systems. We have a line of quick-release detergents available in 5 and 55 gallons. Filter media such as sand, gravel, and clay, which help provide separation of contaminants in water filtration equipment. We also offer bio-pucks and biostax products for our bioremediation systems, that are designed to alleviate odor in collection pits.
