

The following items are included in the Fan Switch Service Kit (Part# 60099)

QTY	part#	Description
1	20375	Fan Switch Bracket
1	30091	Fan Switch (F180)
2	58085	Machine Screw 6-32 x 5/32
2	50403	Fan Switch Wire (B/W) - 16" Long (w/ Quick Disconnect Terminal)

WARNING: Turn power off to the furnace before replacing the fan switch to avoid electrical shock.

1. Refer to Figure 1. Remove the old Fan Switch (Part# 30008)
2. Refer to Figure 2. Use the two supplied Machine Screws (58085) to mount the new Fan Switch (30091) to the Fan Switch Bracket (20375). Use the screws that were holding the old Fan Switch in place to mount the Fan Switch Bracket.
3. Refer to Figure 3. Make sure the Fan Switch (30091) is making contact with the combustion chamber. If it is not touching, remove the Fan Switch Bracket and bend it slightly harder before re-installing.
4. Replace the Fan Switch wires with the included Black and White striped Fan Switch wires that have Quick Disconnect Terminals (50403)
